*Reasons for Allowance*

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art does not disclose a vertical take-off and landing aircraft including first and second mutually aligned rotors, with each rotor including a propeller; a fuselage positioned along a common axis between the first and second rotors; first and second motorized means positioned at ends of the fuselage and able to drive the propellers in opposite rotational directions; and a wing system positioned radially between the fuselage and baffle plates connected between cowlings of the first and second rotors. Prior art references disclose vertical take-off and landing aircraft having fuselages with aligned sets of rotors, but otherwise lack the specifics recited above.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
